

# T V T S BULLETIN

June 2014

Thanks to the remarkable efforts of the faithful few the much needed refurbishment of Moorsholm range is now complete and shooting can now recommence after a closure of 9 weeks. All of those members who bothered to attend deserve recognition but 'the young Harbinson clan' and Peter Costello among several others merits a special mention for their untiring efforts.

8 tons of sand (322 bags) put onto the backstop. Firing point roof replaced with clear plastic. Entrance gate moved further out. New steps added and everything painted including a fully functioning ladies loo.

## WHAT DID YOU DO TO HELP?

Range maintenance is an essential part of club membership and unfortunately is a necessity to keep to the standards required and is part of your membership commitment. But as usual only a small percentage bothered to help. Most of us have some ailment (comes with age I suppose) but it does not require super human effort to walk down the bank and use a paint brush. Shame on those who could not be bothered to help.

Please keep the range in the condition you will find it now! - Don't leave targets on the backstop. Put all combustible rubbish on the fire otherwise take it home with you.

**PLEASE NOTE MOORSHOLM RANGE WILL BE CLOSED TO MEMBERS  
ON THURSDAY AUGUST 14**

## 2015 SUBSCRIPTIONS.

**Club subs will increase on January 1<sup>st</sup> 2015 to £100 per member.**

(£150 for family membership).

Comparing costs with other clubs this still represents tremendous value for money, and the good news is you can reduce this cost by attending the work parties!

In 2015 a £10 reduction will be available for each work party attended (max 3) £30 per member, which will be deducted from the following years subs. When you attend a work party make sure you put your name on the list of attendees - this is for both Moorsholm and Lawson Way.

17 HMR rifles.

The use of 17 HMR firearms at Moorsholm is strictly forbidden as the muzzle velocity generated exceeds the range limits. 17 HMR = 2550 ft. per second. Range limit is 2150 ft. per second.
